Contents

Volume 91 1988

Commentary
Cutler, D. P.
The role of transport signals and retention signals in constitutive export from animal cells 1

Rattner, J. B. and Bazett-Jones, D. P.
Electron-spectroscopic imaging of the centrosome in cells of the Indian muntjac 5

Hammel, I., Shiloh-Rabinovich, H. and Nir, I.
Two populations of mast cells on fibroblast monolayers: correlation of quantitative microscopy and functional activity 13

Garty, N. B., Galiani, D., Aharonheim, A., Ho, Y.-K., Phillips, D. M., Dekel, N. and Salomon, Y.
G-proteins in mammalian gametes: an immunocytochemical study 21

Patterson, D. J. and Dürrschmidt, M.
The formation of siliceous scales by *Raphidiophrys ambigua* (Protista, Centroheliozoa) 33

Heath, I. B.
Evidence against a direct role for cortical actin arrays in saltatory organelle motility in hyphae of the fungus *Saprolegnia ferax* 41

Heslop-Harrison, J., Heslop-Harrison, Y., Cresti, M., Tiezzi, A. and Moscatelli, A.
Cytoskeletal elements, cell shaping and movement in the angiosperm pollen tube 49

Macer, D. R. J. and Koch, G. L. E.
Identification of a set of calcium-binding proteins in reticuloplasm, the luminal content of the endoplasmic reticulum 61

Clarkson, D. T., Brownlee, C. and Ayling, S. M.
Cytoplasmic calcium measurements in intact higher plant cells: results from fluorescence ratio imaging of fura-2 71

Sorrell, J. M., Mahmoodian, F. and Caterson, B.
Immunochemical and biochemical comparisons between embryonic chick bone marrow and epiphyseal cartilage chondroitin/dermatan sulphate proteoglycans 81

Broers, J. L. V., Rot, M. K., Oostendorp, T., Bepler, G., de Leij, L., Carney, D. N., Vooijs, G. P. and Ramaekers, F. C. S.
Spontaneous changes in intermediate filament protein expression patterns in lung cancer cell lines 91

Inouye, K.
Differences in cytoplasmic pH and the sensitivity to acid load between prespore cells and prestalk cells of *Dictyostelium* 109

Busby, C. H. and Gunning, B. E. S.
Establishment of plastid-based quadripolarity in spore mother cells of the moss *Funaria hygrometrica* 117

Busby, C. H. and Gunning, B. E. S.
Development of the quadripolar meiotic cytoskeleton in spore mother cells of the moss *Funaria hygrometrica* 127

Cran, D. G., Moor, R. M. and Irvine, R. F.
Initiation of the cortical reaction in hamster and sheep oocytes in response in inositol trisphosphate 139

Kierszenbaum, A. L., Ueda, H., Ping, L., Abdullah, M. and Tres, L. L.
Antibodies to rat Sertoli cell secretory proteins recognize antigenic sites in acrosome and tail of developing spermatids and sperm 145

Dezsö, B., Nielsen, A. H. and Poulsen, K.
Identification of renin in resident alveolar macrophages and monocytes: HPLC and immunohistochemical study 155

Fujimoto, K. and Pinto da Silva, P.
Macromolecular dynamics of the cell surface during the formation of coated pits is revealed by fracture-flip 161

Announcements

List of Supplements

Commentary
Bohr, V. A.
DNA repair and transcriptional activity in genes 175

Sung, K.-L. P., Sung, L. A., Crimmins, M., Burakoff, S. J. and Chien, S.
Dynamic changes in viscoelastic properties in cytotoxic T-lymphocyte-mediated killing 179

Fok, A. K., Olegario, R. P., Ueno, M. S. and Allen, R. D.
Characterization of monoclonal antibodies to trichocyst antigens in *Paramecium* 191

Bergman, M. G., Wawra, E. and Winge, M.
Chicken histone H5 inhibits transcription and replication when introduced into proliferating cells by microinjection 201

Barton, R. and Gull, K.
Variation in cytoplasmic microtubule organization and spindle length between the two forms of the dimorphic fungus *Candida albicans* 211

Wilkinson, M. M., Busuttil, A., Hayward, C., Brock, D. J. H., Dorin, J. R. and Van Heyningen, V.
Expression pattern of two related cystic fibrosis-associated calcium-binding proteins in normal and abnormal tissues 221

Morgan, D. M. L., Clover, J. and Pearson, J. D.
Effects of synthetic polycations on leucine incorporation, lactate dehydrogenase release, and morphology of human umbilical vein endothelial cells 231

Heyworth, C. M., Ponting, I. L. O. and Dexter, T. M.
The response of haemopoietic cells to growth factors: developmental implications of synergistic interactions 239

Brownlee, C. and Pulsford, A. L.
Visualization of the cytoplasmic Ca^{2+} gradient in *Fucus serratus* rhizoids: correlation with cell ultrastructure and polarity 249

Szöllösi, M. S. and Szöllösi, D.
'Blebbing' of the nuclear envelope of mouse zygotes, early embryos and hybrid cells 257

Owens, N. F., Gingell, D. and Trommler, A.
Cell adhesion to hydroxyl groups of a monolayer film 269

Copeman, M. C. and Harris, H.
The extracellular matrix of hybrids between melanoma cells and normal fibroblasts 281

Snaar-Jagalska, B. E. and Van Haastert, P. J. M.
Dictyostelium discoideum mutant *synag 7* with altered G-protein adenylate–cyclase interaction 287

Okuda, A. and Kimura, G.
Non-specific elongation of cell cycle phases by cycloheximide in rat 3Y1 cells, and specific reduction of G_1 phase elongation by simian virus 40 large T antigen 295

McKechnie, N. M., Boulton, M., Robey, H. L., Savage, F. J. and Grierson, I.
The cytoskeletal elements of human retinal pigment epithelium: *in vitro* and *in vivo* 303

Lombardi, T., Montesano, R., Furie, M. B., Silverstein, S. C. and Orci, L.
In vitro modulation of endothelial fenestrae: opposing effects of retinoic acid and transforming growth factor β 313

Announcements

List of Supplements

Commentary
Richardson, W. D.
Introducing proteins into cultured animal cells 319

Book Reviews 323

Chaly, N. and Brown, D. L.
The prometaphase configuration and chromosome order in early mitosis 325

Middleton, C. A., Brown, A. F., Brown, R. M. and Roberts, D. J. H.
The shape of cultured epithelial cells does not depend on the integrity of their microtubules 337

Dübel, S. and Little, M.
Microtubule-dependent cell cycle regulation is implicated in the G_2 phase of *Hydra* cells 347

Fujisawa, T.
Inhibition of stenotele commitment by an endogenous factor in *Hydra* 361

Owens, N. F., Gingell, D. and Bailey, J.
Contact-mediated triggering of lamella formation by *Dictyostelium* amoebae on solid surfaces 367

Harrison, L. G., Luck, S. D., Munasinghe, B. D. J. P. and Hall, L. D.
Magnetic resonance imaging approaching microscopic scale: maturation stages of *Acetabularia mediterranea* reproductive caps 379

Jantzen, H., Schulze, I. and Stöhr, M.
Relationship between the timing of DNA replication and the developmental competence in *Acanthamoeba castellanii* 389

Rawlins, D. J. and Shaw, P. J.
Three-dimensional organization of chromosomes of *Crepis capillaris* by optical tomography 401

Kistler, J. and Bullivant, S.
Dissociation of lens fibre gap junctions releases MP70 415

Bouffler, S. D. and Ord, M. J.
Parallel development of cadmium resistance and *in vitro* transformation in cultured Indian muntjac cells 423

Mogensen, M. M. and Tucker, J. B.
Intermicrotubular actin filaments in the transalar cytoskeletal arrays of *Drosophila* 431

Zatsepina, O. V., Chelidze, P. V. and Chentsov, Y. S.
Changes in the number and volume of fibrillar centres with the inactivation of nucleoli at erythropoiesis 439

List of Supplements

Commentary

Forer, A.
Do anaphase chromosomes chew their way to the pole or are they pulled by actin? 449

Wilson, P. J. and Forer, A.
Ultraviolet microbeam irradiation of chromosomal spindle fibres shears microtubules and permits study of the new free ends *in vivo* 455

Hughes, K., Forer, A., Wilson, P. and Leggiadro, C.
Ultraviolet microbeam irradiation of microtubules *in vitro*: The action spectrum for local depolymerization of marginal band microtubules *in vitro* matches that for reducing birefringence of chromosomal spindle fibres *in vivo* 469

Segall, J. E., Bominaar, A. A., Wallraff, E. and de Wit, R. J. W.
Analysis of a *Dictyostelium* chemotaxis mutant with altered chemoattractant binding 479

Yoshizato, K., Nishikawa, A. and Taira, T.
Functionally polarized layers formed by epidermal cells on a permeable transparent collagen film 491

Kohno, T. and Shimmen, T.
Mechanism of Ca^{2+} inhibition of cytoplasmic streaming in lily pollen tubes 501

Koch, G. L. E., Booth, C. and Wooding, F. B. P.
Dissociation and re-assembly of the endoplasmic reticulum in live cells 511

Cooksey, B. and Cooksey, K. E.
Chemical signal-response in diatoms of the genus *Amphora* 523

Zachleder, V. and Sětlík, I.
Distinct controls of DNA replication and of nuclear division in the cell cycles of the chlorococcal alga *Scenedesmus quadricauda* 531

Scully, R. R., Dedman, J. R. and Schultz, S. G.
Localization of calmodulin in the enterocyte of *Necturus* small intestine 541

Little, P., Skouteris, G. G., Ord, M. G. and Stocken, L. A.
Serum from partially hepatectomized rats induces primary hepatocytes to enter S phase: a role for prostaglandins? 549

Orr, D. J. and Smith, R. A.
Neuronal maintenance and neurite extension of adult mouse neurones in non-neuronal cell-reduced cultures is dependent on substratum coating 555

Dallai, R., Marchini, D. and Callaini, G.
Microtubule and microfilament distribution during the secretory activity of an insect gland 563

Grundel, R. and Rubin, H.
Maintenance of multiplication rate stability by cell populations in the face of heterogeneity among individual cells 571

Miller, K. R., Jacob, J. S., Burger-Wiersma, T. and Matthijs, H. C. P.
Supramolecular structure of the thylakoid membrane of *Prochlorothrix hollandica*: A chlorophyll *b*-containing prokaryote 577

Hagan, I., Hayles, J. and Nurse, P.
Cloning and sequencing the cyclin-related *cdc13*$^{+}$ gene and a cytological study of its role in fission yeast mitosis 587

Ahkong, Q. F. and Lucy, J. A.
Localized osmotic swelling and cell fusion in erythrocytes: possible implications for exocytosis 597

Szöllösi, D., Czolowska, R., Szöllösi, M. S. and Tarkowski, A. K.
Remodeling of mouse thymocyte nuclei depends on the time of their transfer into activated, homologous oocytes 603

Kirkland, S. C.
Polarity and differentiation of human rectal adenocarcinoma cells in suspension and collagen gel cultures 615
